Page numbers should be in the top right corner. The first page must be the title page, followed by abstract, text, tables, and figures.

2. Title page is the first page and contains:

References guideline

The authors must use Vancouver style and use Arabic numbers as seen in the manuscript. Use superscript numbers in-text to cite sources of information. Superscript numbers are in order of citation. The superscript number is inserted

into the document immediately next to the fact, concept, or quotation being cited. If citing more than one reference at the same point, separate the numbers with commas and no spaces between. The short name of the journal must follow Index Medicus format.

Examples for references

1. English article: List all authors' names if less than seven. If seven or more authors, list only the first six names and follow by et al.

For example:

If the authors are committees, groups, or institutes:

1. Report of the International Reflux Study Committee. Medical versus surgical treatment of primary vesicoureteral reflux. *Pediatrics* 1981;67:392-400.

2. Thai articles must be translated to English language. Dates must be changed to the Gregorian calendar if originally listed in Buddhist calendar format. Use the same reference pattern as for English articles.
