

Editorial

The twelfth issue of Insight Urology (ISU) was published online in June 2026. It comprises three original articles and three review articles. It covers several fields of urology, such as oncologic urology, endourology, pediatric urology, and kidney transplantation.

Two review articles were submitted by renowned authors, namely “**Contemporary management of locally advanced and metastatic renal cell carcinoma: An update of current evidence**” and “**Current management practices of the posterior urethral valve.**” We are confident that you will enjoy reading and applying the knowledge in these articles to your present urological work, especially in cases concerning the treatment of renal cell carcinoma patients and posterior urethral valves.

The front cover of this issue features a photograph of **Bajrakitiyabha, Princess Rajasarini Siribajra**, also known as **Princess Bha**, who was a member of the Chakri dynasty of Thailand. She was the eldest child of King Vajiralongkorn, and the only one born to his first wife Princess Soamsawali. She was born during the reign of her grandfather, King Bhumibol Adulyadej, and was his eldest grandchild.

Working as a professional attorney, Her Royal Highness spearheaded humanitarian efforts to assist the rehabilitation of incarcerated Thai women and their children, and was a key figure in the creation and implementation of the United Nations’ “Bangkok Rules”—the first set of international guidelines addressing the treatment of women in the prison system. Beloved among the Thai public for her work and demeanor, she also served as the ambassador of Thailand to Austria, Slovakia, and Slovenia.

The passing of Her Royal Highness Princess Bajrakitiyabha on June 11, 2026 sparked a profound, nationwide mourning period across Thailand. With deepest sorrow and respect, the Editorial Board of ISU mourns the passing of HRH Princess Rajasarini Siribajra, and her legacy of kindness and dedication shall remain in our heart forever.

Rest in peace.

Assoc. Prof. Phitsanu Mahawong, M.D.
Editor in Chief of Insight Urology
