Thai Dental Public Health Journal

Editor's letter

This special issue of the Journal is a literature review regarding Early Childhood Caries (ECC) which benefits the continuous work of the first and second ECC forums consisted of six countries in Southeast Asia, hosted by Thailand and Cambodia respectively. The contents start with the important of Early Childhood Caries in terms of public health problem in many countries including Thailand. Follow by, reviews of epidemiology, aetiology, oral health promotion and prevention; and management of ECC by different approaches. We hope that this journal issue will be benefit readers who want to understand every dimension of ECC. Finally, thank you Borrow Foundation for supporting the publication.
