## Siriraj Medical Journal

### ORIGINAL ARTICLE

- 432 Molecular Subtypes of Ductal Carcinoma In Situ (DCIS) Identified by Expression of ER, PR, HER2, and Ki-67  
*Warapan Numprasit, et al.*
- 438 Effect of Age on Recurrence in Hormone Receptor-Positive Breast Cancer, and Factors Significantly Associated with Cancer Recurrence  
*Warapan Numprasit, et al.*
- 446 Outcomes of the Recombinant Human Epidermal Growth Factor Addition to Chloramphenicol Ointment for Facial Burn Wound Healing  
*Pornprom Muangman, et al.*
- 450 Decision-making Factors in Non-operative Management of Zygomatic Fractures  
*Somphon Roeksomtawin, et al.*
- 457 Retrospective Analysis of Outcomes in Elderly Patients with Adenocarcinoma of Stomach and Esophagogastric Junction Following Three Different Treatments  
*Thammawat Parakonthun, et al.*
- 466 The Malignant Potential in Adult Choledochal Cysts; an Awareness Issue  
*Pholasith Sangserestid, et al.*
- 472 Survival and Factors Predictive of Survival in Patients with Thymic Carcinoma  
*Suparauk Geanphun, et al.*
- 480 Impact of Accuracy of Preoperative Transthoracic Echocardiography on Complex Congenital Heart Surgery in Pediatrics  
*Vutthipong Sanphasitvong, et al.*
- 486 Presence of Residual Venous Thrombus at Warfarin Withdrawal: Is It a Predictor for Recurrence After a First Episode of Symptomatic Provoked Proximal Deep Venous Thrombosis in the Thai Population?  
*Kanin Pruekprasert, et al.*
- 491 Endovascular Thrombectomy versus Open Surgical Thrombectomy for Thrombosed Arteriovenous Hemodialysis Graft  
*Nattawut Puangpunngam, et al.*
- 499 Outcomes of Autogenous Snuffbox Radiocephalic Arteriovenous Fistula-First Strategy for Hemodialysis Access  
*Banjerd Praditsuktavorn, et al.*
- 506 Formulaic Prediction of Z-Plasty Outcomes Relative to Z Scar Lengthening, Z Flap Tension, and Area of Distortion, and Determination of the Multiple Z-Plasty Configurations that Optimally Increase Z Scar Length, Decrease Z Flap Tension, and Decrease Area of Distortion  
*Nutthawut Akaranuchat, et al.*
