## EDITORIAL

---

At the beginning of New Year 2017, it's time for beginning good things. May this year bring happiness, new inspirations and new success to all members of Royal Thai College of Obstetricians and Gynaecologists (RTCOG).

Improvement of Thai Journal of Obstetrics and Gynaecology (TJOG) has been documented. TJOG has been included in the Thai Journal Citation Index Center (TCI) and the Asian Citation Index (ACI). TJOG received the National Journal Award from the 3<sup>rd</sup> TCI-Scopus-TRF Journal Awards on December 15, 2016. We plan to improve the quality of TJOG to be index in Scopus database. We would like to serve the members of RTCOG for publishing their works in TJOG, and welcome the studies from worldwide researchers.

We would like to thank past RTCOG executive board, past editor in chief, editorial board and staff, reviewers, all members of RTCOG, and all researchers for their kind contribution and support to TJOG.

This first issue of TJOG 2017 contains many interesting articles. One special article is "Microcephaly: significance and how to approach during the zika era".
