

Editor's Note

It is the time to change things, including Thammasat Medical Journal (TMJ). With the aim to get into Pubmed & Scopus database, the name of TMJ is officially changed to Asian Medical Journal and Alternative Medicine (AMJAM). We, therefore, rely on readers from international community to contribute high quality works to our journal. Editorial members are continuously expected to work hard to improve the quality of the journal. More changes may be expected in the year to come. We, sincerely, appreciate the reviewers, contributors, and the editorial team for their contribution in the field of medicine and alternative medicine over the past several years. This effort will help bridging the knowledge in the era of changes and the era of new normal. AMJAM is honored to be a part of these changes to help creating a new body of the knowledge in these medical fields.
